# miniBeamer PDF presentation with R Markdown

Get it from GitHub: https://github.com/mckraqs/miniBeamer

# Outline

## R Markdown

This is an R Markdown presentation. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document.

# Outline

## Shower introduction

These slides use a template from the shower presentation system.
Notable features:

1. Works in all modern browsers
2. Presentation fully keyboard accessible
3. Multiple themes available
4. Printable to PDF

Shower noun. A person or thing that shows.

# Two column layout

What is it? Your fathers lightsaber. This is the weapon of a Jedi Knight. Not as clumsy or as random as a blaster. An elegant weapon for a more civilized time. For over a thousand generations the Jedi Knights were the guardians of peace and justice in the Old Republic. Before the dark times, before the Empire. How did my father die? A young Jedi named Darth Vader, who was a pupil of mine until he turned to evil, helped the Empire hunt down and destroy the Jedi Knights.

# Two column layout, independent columns

How did I get into this mess? I really don't know how. We seem to be made to suffer.
It's our lot in life. I've got to rest before I fall apart.

# Lists

1. Simple lists are marked with bullets
2. Ordered lists begin with a number
3. You can even nest lists one inside another
   - Or mix their types
   - But do not go too far
   - Otherwise audience will be bored
4. Look, seven rows exactly!

## Formulas

Formulas are rendered by KaTeX,
https://github.com/Khan/KaTeX
It supports both inline: $y = x/2$ and displayed formulas:

$$x_{1,2} = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

# Slide with quote

> *Learning more about programming is a long-term investment: it won't pay off immediately, but in the long term it will allow you to solve new problems more quickly, and let you reuse your insights from previous problems in new scenarios.*

**Hadley Wickham**

# Slide with R Code and Output

- Some text

```
hw <- 2 + 2
hw
## [1] 4
```

## Tables

|                   | mpg  | cyl | disp  | hp  |
